Electrolysis

Amber Beeching (North Adelaide)

'I am a qualified Electrologist, and have been specialising in Electrolysis, Red Vein Therapy, Milia Removal and Facial Treatments for over 5 years. I am a caring professional, and extremely experienced operator and I ensure your treatments are private and exclusive.

I pride myself on my abilities to deliver the results you need, with my skills being passed down from my mother Ann, from her strict teaching skills to the experiences she had working in her own clinic. Ann Beeching passed on this expertise to me while training me over a long period of time, with VERY rare one on one training! Ann Beeching likes to regularly visit my clinic to say hello to my happy clients!

Treatments in my clinic are not disturbed by phone calls or other peoples chatter, the environment is relaxing and quiet and plenty of free parking is available.'

Electrolysis is the only safe and permanent method of hair removal. This method is effective on all hair types including dark, light, thick, fine and hormonal hairs.
