

Where to Buy a Binder!

What Are Chest Binders?

A chest binder is a garment worn to compress breast tissue to give the chest a more masculine (flat) appearance. These garments are much safer than bandages for example, but should still be worn with care and caution. Chest binders may not be comfortable but they should not be painful either. Always read the health directions of each website and also the washing instructions for the binder. Carefully check the sizing as brands differ and they do not use the same sizing as t-shirts for example.

- It is recommended to always check shipping totals for correct currency conversion when purchasing from outside Australia. Also check time frames from purchase through to expected delivery date as some products are custom made and may take longer than others to deliver.
- This is not an exhaustive list, nor a guarantee a product will be the right one for you and should be considered a guide only. At the time of writing, all were known to ship to South Australia.
